Signs and Symbols

Numbers	Anytime you see recurring numbers such as 111, 222, 555 etc., is usually an indicator the angels are trying to get your attention. These numbers have special meanings attached to them.
Electronics	Angels seem to have their own magical way with electronics. The most common signs I get are flickering lights, television changing channels on its own, or cell phone turning on and off.
Music	Angels may try to send you a specific message if you notice certain songs playing repeatedly over the radio. Pay careful attention to the song title and the lyrics.
Feathers	Angels absolutely love sending us feathers! Finding one, especially in an unusual place, is like receiving a love note. Feathers can come in many shapes and colors, however white feathers are classically known to represent love from the angels.
Flashes of Light	Since angels are beings of light, seeing flashes or sparkles of light from the corner of your eye or floating colored orbs is a good indicator that your angels are with you.
Coins IVONNE COTE	Finding a penny or a dime is a great message from your angels telling you to keep going, you are on the right track.
